- **Engage in play and foster creativity**
  Play releases endorphins, improves brain functionality, and stimulates creativity. Play also breaks down barriers and improves relationships.

- **Expand awareness of self, other, and team**
  Awareness of one’s strengths, weaknesses, personality, preferences, etc., has a significant impact on how we behave and interact with others. Self-awareness influences situations and the climate of the group.

- **Enhance communication and trust**
  Communication establishes trust and deepens relationships. Trust encourages collaboration and enables team members to work together on collective goals rather than personal interests.

- **Experience the value of appreciation**
  Giving and receiving appreciation develops bonding, strengthens relationships, and improves employee engagement. Appreciation offers the brain a boost of dopamine that motivates and inspires, leading to improved employee retention.

- **Relax and recharge as individuals and teams**
  Encouraging employee relaxation improves morale, productivity, and the bottom line. Stress reduction promotes healthy workplace relationships, reduces absenteeism, and improves retention rate.
Our Meeting Bundles minimize your planning woes and maximize your group’s experience.

You deal with one single contact person, but reap the benefits of an array of amenities—and sit back knowing we only partner with exceptional facilitators to provide your meeting with a valuable experience.
